

The perfect fit: Shaping the Fit for 55 package to drive a climate-compatible heat pump market

Tuesday, 17 May, 14:30 – 16:00 (CET) | Webinar

Alongside efficiency measures and heat networks, heat pumps represent the key technology to replace fossil fuels for heating, helping Europe to deliver the EU Green Deal and reduce its reliance on natural gas from Russia. Rapid action on accelerating the deployment of heat pumps in buildings, district heating and industry is needed and heat pumps are expected to play a significant role in the EU's upcoming REPowerEU Plan.

This webinar will present findings from a new report by Regulatory Assistance Project, Agora Energiewende, CLASP, and the Global Buildings Performance Network making the case that the 'Fit for 55' package currently under negotiation by the Council of the EU and the European Parliament can play a significant role in driving a robust heat pump market in the EU. The report presents key barriers to heat pump deployment, identifies six areas where the Fit for 55 package can go further in supporting the uptake of heat pumps and details how Member State-level policy reforms can move ahead of the Fit for 55 changes in the shorter term.

The webinar will feature a presentation of the report followed by a moderated panel discussion with key stakeholders and policymakers.

MORE INFORMATIONEN & REGISTRATION

The participation is free of charge. You can register on our website:

AGENDA

Moderation: Andreas Graf , Senior Associate EU Energy Policy, Agora Energiewende	
14:30	Welcome and introduction (incl. technical information) Nikola Bock , Head of Events, Agora Energiewende
14:35	Presentation of the Report: "A Perfect Fit: Shaping the Fit for 55 package to drive a climate-compatible heat pump market" <ul style="list-style-type: none">• Marie Baton, Europe Lead, CLASP• Richard Lowes, Senior Associate, Regulatory Assistance Project
15:00	Q&A on the report
15:10	Panel Discussion Moderation: Jan Rosenow , Principal and European Programme Director, Regulatory Assistance Project <ul style="list-style-type: none">• Veerle Beelaerts, Head of Technology, Association of European Heating Industry• Karlis Goldstein, Energy Efficiency Assistant, Cabinet of Kadri Simson• Thomas Nowak, Secretary General, European Heat Pump Association
15:58	Closing of the webinar Nikola Bock , Head of Events, Agora Energiewende
16:00	End of the Event
